

# TransTech Solutions

***"All Solutions Are Not Created Equal"***<sup>™</sup>

MotorVac solutions clean and condition from the inside out.

- ▶ Our **TransTech solution** will loosen and remove varnish, sludge and contaminants that build up throughout the transmission system.
- ▶ Our cleaning process starts from the torque converter all the way through the fluid lines.
- ▶ **TransTech solutions** use a proprietary formula that combine various elements to form a safe and effective cleaning and conditioning process.
- ▶ Our solutions do not contain methanol, isopropanol, hexanol, butanol or ethanol, or other potential corrosive materials.
- ▶ **TransTech solutions** will not damage the transmission system components and can be used with confidence.

The TransTech service kit is specifically formulated to be used with the TransTech system!

## **MotorVac TT1 & TT2**

Case of 6 (2-Step Service Kits)

Part No. 400-0137

# ▶▶ MOTORVAC TRANSTECH TT1 & TT2

## Why Use TransTech Solutions?

Motorvac solutions gently clean dirt, varnish, sludge and other types of contaminants that build up in critical areas of the transmission system. MotorVac solutions will not damage vehicle surfaces or paint, and are safe for use on all transmission system components.

## How MotorVac Solutions Work TT1

This specially formulated Automatic Transmission Fluid Cleaner suspends and flushes harmful varnish, sludge, and contaminants from the transmission system, torque converter, pump, and ATF cooler and fluid lines. This solution also quiets and smoothes shifting and will prolong transmission life.

## TT2

This specially formulated Automatic Transmission Fluid Conditioner will extend transmission life by keeping seals pliable, and reducing the possibility of leakage. This solution will also reduce fluid oxidation and heat related breakdowns.

## Features

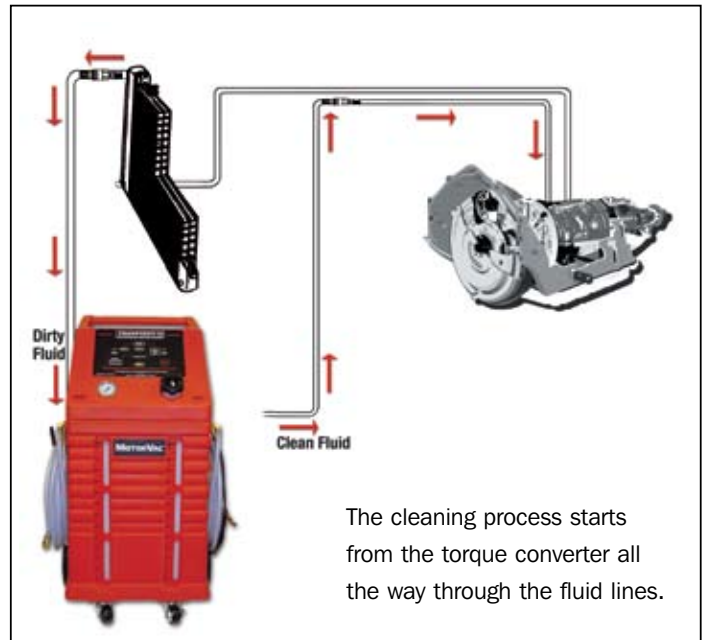

- ▶ Non-Hazardous
- ▶ Non-Carcinogenic

## Benefits

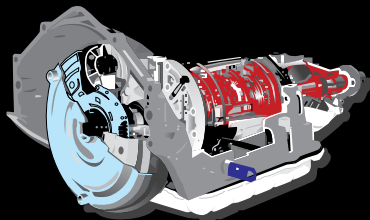

- ▶ Quiets and Smoothes Shifting
- ▶ Reduces Oxidation and Heat Related Breakdowns
- ▶ Extends Transmission Life

## Why Use the TransTech System?

The TransTech III System is designed to exchange virtually all of the used automatic transmission fluid in a vehicle's transmission, and do it in only one simple step! This turnkey system completes the fluid exchange faster and more efficiently because of its unique interface and easy-to-use design. The unit will flush virtually all of the old transmission fluid and replace it with the new fluid while the engine is running. An advanced electronic interface provides complete, "one touch" control and a quick and easy "Drain Pan" function allows for transmission filter changes during the ATF exchange. The service is compatible with most foreign and domestic vehicles. The TransTech III can increase a shop's profits by reducing the time it takes to do a complete fluid exchange to approximately 10 minutes.

## Extends Transmission Life

## New vs. Old Fluid

You can see the difference. Old fluid looks almost like motor oil—and isn't much better for your car's transmission. To protect the sophisticated machinery in today's transmissions, make sure your transmission looks—and is—as good as new.
